SUMMARY

I am pursuing two Master of Science (Technology) degrees at the same time: International Design Business Management (Tech) at Aalto University, and Information and Communication Technology at the University of Turku, majoring in Data Analytics. Alongside my studies I have worked as a Research Assistant at the University of Turku, working with databases and Linux server environments. I have also held a range of positions of trust in student organisations. I have a strong command of programming languages such as Python and JavaScript and broad knowledge of computer science, especially machine learning and AI models.

EXPERIENCE

Research Assistant (Data Manager), University of Turku **April 2026 – April 2027**

- Responsible for designing and deploying a new database (GraphQL) for the research groups of the Department of Biology at the University of Turku. I also maintain and validate the research groups' data.

Research Assistant, University of Turku (TRILA) **August 2025 – April 2026**

- Part-time continuation of my internship at the Turku Research Institute for Learning Analytics. I create computational thinking content as part of the ViLLE team.

Intern, University of Turku (TRILA) **May 2025 – August 2025**

- Assisted the ViLLE team at the Turku Research Institute for Learning Analytics on several projects, mainly computational thinking and mathematical content creation.

Chairperson, Digit ry **January 2025 – December 2025**

- In 2025 I was Chairperson of Digit ry, the student association for Computer Science students at the University of Turku. My responsibilities included representing the association, leading the team, planning the organisation's events, communicating with stakeholders, and managing a budget of about €100,000.

Pönkeli, May Day Magazine of Turku Engineering Students **August 2023 – Present**

- Editor for four full editorial seasons. My duties have included planning and organising events, graphic design, producing social media content, and updating the website.

EDUCATION
